### Wound Care

SIONBRANDS offers a broad range of gauze, bandages, non-woven and non-adherent dressings of different designs and specifications for surgical and wound care.

These products are nurse orientated although technology is driving physician interest. We seek to reduce the cost of healing to the healthcare provider.

In our efforts to constantly develop new outstanding products we have introduced a new line of Organic Pads & Swabs made from organic, biodegradable cotton material.

### Anti-bacterial & Antiseptic

In the Anti-bacterial & Antiseptic area SIONBRANDS develops, manufactures and supplies a wide range of single use surgical products for the Operating Theatre and Critical Care Units, which are manufactured from the highest quality materials.

The Surgical Packs, from Abdominal to Laparoscopy packs offer the surgical staff all the draping systems and disposable surgical devices needed to perform the specific surgical procedure as well as reduce infection. We offer highly customizable packs which are manufactured according to the customer's specifications, the components are packed in a sequential order to reduce setup time and increase efficiency in the Operating Room.

All custom procedure packs contain several single use medical devices in one sterile pack designed for a specific operation. This advanced solution provides increased cost efficiency, better patient care and assists with infection control.

### Lubricating Jelly & Refreshing Swabs

Our innovative product line is based on the company's new impregnated technology; this line includes an extensive range of patient care and personal care products.

The Lubrication products are used prior the insertion of catheters, endoscopes, and surgical instruments. The Oral Care products are used for patients on oxygen/fluid restrictions and comatose patients on IV care, as well as Routine Care for elderly patients.

SIONBRANDS specializes in unit-dose and multidose packaging of products based on solutions containing active ingredients.

One of our major goals is to perceive the market changes and customer needs as we search for new ways to combat infection and cross contamination.

### Skin Treatment

Skin Treatment products are delivered in a pharmaceutical-grade basis and serve to protect the skin and maintain optimal skin integrity.

The line includes various barrier creams and ointments for incontinence and other moisture related issues that can cause skin breakdown.

Each product is manufactured to strict standards ensuring the highest quality and consistency. The rich product formulations provide additional values, in the cost per unit as well as the volumes needed for each usage.

SIONBRANDS provides this line of products in a variety of package sizes and dispensing options, each one designed to address specific uses and needs.

### Advanced Wound Care

In the Advanced Wound Care area, SIONBRANDS develops and manufactures a wide range of advanced, easy-to-use and affordable advanced wound care and support line products.

L-Mesitran is a pioneering product range, based on Medical Grade Honey with excellent clinical results.

These advanced wound care dressings were the first to receive the CE mark and FDA approval. They have been used on a variety of severe wounds, including antibiotic resistant (MRSA) infected wounds.
